Rising To The Challenge...

BUDCO
ENTERPRISES, INC.
Licensed Master Riggers

Our Reputation Is Built On Rising To The Most Rigorous

• ENGINEERING • DERRICK WORK • ERECTORS • BRIDGE REHABS • HIGH

BUDCO Enterprises has been serving the tri-state area and beyond for over 20 years, turning drafting board ambitions into reality. We specialize in high-rise & heavy rigging, structural steel fabrication, art sculpture installations and erection. When the project specifies unusually rigorous standards, our 20-year record of performance, professionalism, and the capacity to rise to the challenge has proven itself time and again.

BUDCO provides a complete portfolio of rigging and construction equipment and services, as well as extensive indoor and outdoor warehouse facilities, serving a solid base of customers ranging from electrical, mechanical, and general contractors to building owners, property managers, art galleries, museums and motion picture production companies.

We get the job done, and get it right.

Tough jobs demand experienced crews. Our multiple divisions can provide whatever is required to do the job: expert engineering, fabrication, erecting, and rigging... all in house. BUDCO's rigging team has a roster of NYC licensed master riggers authorized to hoist any weight inside or outside any structure in the City. We put heavy equipment on rooftops, move large transformers and generators and install multi million dollar art sculptures.

Through the years, BUDCO derricks have been mounted on the tops of countless buildings across New York. Whether we are rigging emergency generators to the top of a Wall Street building, or performing a turnkey chiller plant change out in a midtown office tower, we have the right equipment and the qualified people to get the job done. Employing our own stiff leg derricks, we can hoist up to 35 tons to buildings over 800 feet high and unreachable by cranes.

BUDCO steel construction contractors have provided erectors and certified welders on hundreds of projects ranging from major railroad and building renovations to the installation of over-head cranes and hoisting systems.

Standards.

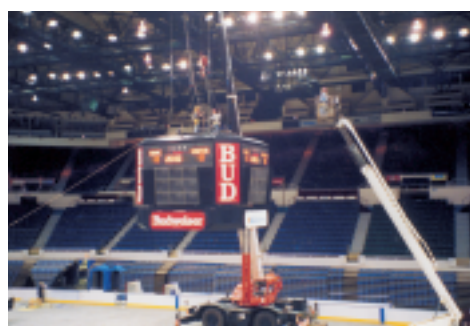

R I S E & H E A V Y R I G G I N G • A L T E R A T I O N S • F A B R I C A T I O N • W A R E H O U S I N G

Our fleet of modern, well-maintained vehicles provides us with the ability to receive materials and equipment at our warehouse for temporary storage, and then deliver them on schedule to the job site for installation.

Taking it to the next level.

Since 9/11, our structural steel division has been called on for their in-depth expertise in bridge rehabilitations, building erection, and railroad work. We are particularly proud of our involvement in the renovation of Penn Station and the restoration of the #1 and #9 subway lines at the World Trade Center, a project requiring the installation of over 500 tons of steel in three months and finished ahead of schedule, for which we were honored by The Real Estate Construction & Review as a top supportive team member in the New York Tri-State area.

In today's highly unpredictable construction environment, the success of BUDCO Enterprises, Inc. can be attributed to its problem-solving skills, forward thinking, versatility, state-of-the-art equipment and deeply experienced teams committed to doing their best with difficult jobs. BUDCO has the ability, and the track record to prove it and rise to any occasion.

Let BUDCO Lift The Load Off Your Mind.

The best way to take full advantage of all BUDCO brings to the table on behalf of your project is to involve us from the start. By letting us be involved in the planning stage we can provide you with a money-saving plan that allows us to stay with you from start to finish, a plan that emphasizes seamless transitions from one phase to the next. In any event, rest assured that our reputation precedes us, and that if BUDCO is on the job, you can count on things going smoothly.

Don't hesitate to contact us with any questions you may have about your project, or to set up an appointment. You can visit us at www.budco.us. Or call us at 631-434-6500.
